Resolution No. 109: Support for Pain Management Research, Treatments and Therapies at DoD, VA and NIH
Origin: Maryland
Submitted by: Convention Committee on National Security

WHEREAS, The characteristics of modern warfare, including the global war on terrorism, exposes members of the uniformed services to many adverse and dangerous environmental diseases and living conditions; and

WHEREAS, War zone conditions, replete with noxious gases released from explosive devices among other potentially harmful environmental exposures in such theaters as the Middle East and Southwest Asia, as well as in other areas of the world in which service members are exposed to combat-like conditions, produce traumatic, life altering, battlefield scars, and casualties unheard of in previous wars including infections, instant crushing of protective skull and body bones, loss of sight and limbs, dehydration, blood and other body infections and, in some cases, severely impairment or total loss of mental and physical body motor functions; and

WHEREAS, Military medical rapid response teams provide superb, state of the art, medical and psychological life-saving treatment and care at battlefield sites with an extraordinarily high success rate; and

WHEREAS, Military, Department of Veterans Affairs, and some specialty civilian health care treatment facilities are overburdened with caring for the most serious and most painful battlefield casualties ever witnessed from war; and

WHEREAS, The nation’s medical and mental health care professionals have not been provided with sufficient resources to adequately research, diagnose, treat, and manage acute and chronic pain associated with present day battlefield casualties; now, therefore, be it

RESOLVED, By The American Legion in National Convention assembled in Cincinnati, Ohio, August 30, 31, September 1, 2016, That federal funding for pain management research, treatment, and therapies at the Department of Defense, Department of Veterans Affairs (VA) and at the National Institutes of Health be significantly increased and that Congress and the Administration re-double their efforts to ensure that an effective pain management program be uniformly established and implemented; and, be it finally

RESOLVED, That the Department of Defense and the Department of Veterans Affairs increase their investments in pain management clinical research by improving and accelerating clinical trials at military and VA treatment facilities and affiliated university medical centers and research programs.
